

FIXED: description, interface, visible input

"Remove duplicates from a list." dedup(data)

data = [3, 1, 3, 2]

Prompt A: change expected output

[3, 1, 2]

Same model generates program P_A

Held-out evaluation

Input: [4, 2, 4, 1]

Expected: [4, 2, 1]

First-occurrence order

Prompt B: change expected output

[1, 2, 3]

Same model generates program P_B

Held-out evaluation

Input: [4, 2, 4, 1]

Expected: [1, 2, 4]

Ascending order

Switch success: BOTH programs pass their assigned rules
